# HIGHLIGHTS

## Conceptual principles:

1. Haemodynamic monitoring
2. Pressure-Volume loops
3. Macro and microcirculation
4. Tissue perfusion and monitoring
5. Hypotension prediction index
6. Mechanical circulatory assist devices
7. Recent advances

## Workstations:

1. Arterial pressure
2. Central venous pressure
3. Pulmonary artery pressure
4. Echocardiography
5. Cardiac output: Invasive, less-invasive, minimally invasive, Non-invasive.
6. Monitoring of mechanical circulatory assist devices.
7. Tissue Oximetry and Cerebral autoregulation
